Water Conservation Alert

Yorba Linda Water District, along with all Orange County water providing agencies, strongly urges water consumers to immediately stop all outdoor water use between now and the evening of Tuesday April 3rd.

Metropolitan Water District's Diemer water filtration plant is currently undergoing necessary major maintenance and repairs. This is resulting in a significant part of Orange County's water supply being temporarily unavailable.

To insure that we can get through this situation, Yorba Linda Water District asks that you eliminate all outdoor water usage: That is lawn and other landscape irrigation, hosing of driveways, sidewalks and patios and vehicle washing. All public, institutional and commercial landscape irrigation has been turned off for the duration of this alert. Helpful indoor conservation includes taking shorter showers and delaying dish and clothes washing.

Please do all you can to help insure that water service outages do not occur.
